MUET Band 5

TECHNICAL SKILLS

- Blockchain & Smart Contracts
- Solidity / Motoko
- PHP · Laravel · ThinkPHP
- Golang (Gin)
- Python
- Node.js · Java
- Vue.js
- RESTful API
- MySQL · PostgreSQL
- iOS & Android Dev

Khoo Cheng Long

Blockchain Expert · Senior Software Developer · CIO

Puchong, Selangor, Malaysia

PROFILE

An accomplished IT professional and entrepreneur with over 15 years of experience specialising in blockchain technology, system administration, and AI research. Currently serving as Chief Information Officer at IOTA Technologies Sdn. Bhd., leading the development of advanced blockchain solutions including smart contracts for decentralised applications (DApps) on the Internet Computer platform.

Proven track record in securing competitive grant programmes, engineering intuitive front-end applications with Vue.js, and delivering scalable smart contracts using Motoko and Solidity. Passionate about entrepreneurship, cross-functional collaboration, and staying at the forefront of emerging technologies. Driven by a commitment to generating innovative business solutions and fostering meaningful industry partnerships.

EXPERIENCE

Chief Information Officer

2018 · Present

Iota Technologies Sdn. Bhd., Malaysia

- ▶ Spearheaded the development of advanced blockchain solutions, including smart contracts for Blockchain Product Tracking technology, significantly enhancing product traceability and security.
- ▶ Secured and executed the **Dfinity Developer Grant Programme** (Grant ID: 22531594), successfully delivering the project in November 2022.
- ▶ Led cross-platform development initiatives ensuring seamless integration and compatibility across multiple operating systems.
- ▶ Directed middleware development to facilitate efficient communication and data management between disparate software applications.
- ▶ Engineered user-centric front-end applications using **Vue.js**, delivering intuitive and seamless user experiences.
- ▶ Oversaw development and optimisation of **MySQL** databases, ensuring high performance and data integrity.
- ▶ Built robust DApps and smart contracts using **Motoko** for Internet Computer, advancing decentralised technology adoption.
- ▶ Managed and mentored a diverse IT team, fostering a collaborative environment through effective leadership and strategic planning.

- CGPA 4.0 Graduate
- Dfinity Grant Awardee
- Internet Computer ICP
- EVM Ecosystems
- ETH · BNB · Polygon · TRX

EXPERIENCE (CONTINUED)

IT Helpdesk Engineer

2016 – 2018

OPUS IT Services Pte. Ltd., Singapore

- Delivered first-level and second-level technical support to internal staff at Resorts World Sentosa (RWS).
- Diagnosed and resolved POS system errors, Windows-related issues, and managed Active Directory operations.
- Ensured timely resolution of technical incidents, consistently improving operational efficiency and end-user satisfaction.

International Work Experience

2015 – 2016

Working Holiday · New Zealand

- Completed a 3-month working holiday in New Zealand, gaining valuable cross-cultural communication and adaptability skills in an international work environment.

Junior System Administrator

2012 – 2015

Bayer Southeast Asia, Singapore

- Administered the Lotus DCAP document library and managed change management requests for internal corporate clients.
- Addressed GPSC incident tickets, delivering solutions or escalating issues to appropriate support tiers.
- Monitored physical and logical servers using IBM Director and GPSC incident ticketing systems, ensuring system integrity and performance.
- Provided first-level support for server warnings, disk space threshold alerts, and offline alerts.
- Assembled and decommissioned servers in compliance with IQOQ and SOP guidelines.
- Managed backups using Backup EXEC 2010/2012, Symantec BESR, and VDR; diagnosed and resolved backup errors in coordination with stakeholders.
- Conducted remote server operations across China and ANZ regions, providing backup support and ensuring data integrity.
- Liaised with vendors via phone, email, and Microsoft Lync for technical support and issue resolution.

PROJECT TYPES

- Trading Platforms
- Crypto Exchanges
- DeFi / DApp
- NFT Marketplaces
- ERP Systems
- E-Commerce
- Mobile Apps
- Smart Contracts

BLOCKCHAIN NETWORKS

- Internet Computer (ICP)
- Ethereum (ETH)
- BNB Smart Chain
- Polygon (MATIC)
- TRON (TRX)

NOTABLE PROJECTS

Stock, Index & Commodity Trading Platform

Full-stack multi-asset trading platform supporting equities, indices, and commodities with real-time data integration.

Cryptocurrencies Trading Platform

Secure and scalable crypto exchange supporting multiple digital assets with real-time order matching.

MyWallet

Multi-currency digital wallet supporting crypto and fiat with secure transaction management.

ERP Management System

Enterprise resource planning system integrating finance, HR, inventory, and operations modules.

NFT Marketplace

Decentralised marketplace with minting, listing, auction, and royalty management on EVM chains.

Blockchain E-Commerce Platform

On-chain e-commerce with product traceability, immutable transaction records, and smart contract automation.

Smart Contracts (ETH · BNB · Polygon · TRX)

Production-grade smart contracts deployed across major EVM-compatible blockchain networks.

iOS & Android Mobile Applications

Cross-platform mobile apps integrating blockchain wallets, trading features, and enterprise functionalities.

Corporate Website Development

Responsive company websites with modern UI/UX, SEO optimisation, and CMS integration.
